

# PLUMBING M.D. CONTINUES RAPID GROWTH

Locally Owned Plumbing M.D. Recognized as a Leader in Growth for the Second Year in a Row

Plumbing M.D., a service and repair plumbing company that is headquartered in Dixon was recognized by the Sacramento Business Journal as the 9th fastest growing company in the region when the prestigious list was revealed September, 20th 2006.

Moving up from number 20 on last year's list, the company earned a top spot in the rankings by showing a growth of 243%, eclipsing last year's growth of 122%.

Michael Farias, founder and President says, "We continue to grow by having a strong, easily recognizable brand and backing up the brand by providing the consumer with a consistently rewarding experience."

"Our trade marked slogan "the feel good plumbing experience" is not just a slogan," says Farias, "but a way of doing business." Farias believes that for too many years consumers have been accustomed to a plumbing service experience that is anything

but a feel good experience. From the untidy plumber not showing up on time, to having a lack of inventory, tools and equipment on the truck, to a low-ball estimate turning into a price surprise, plumbing experiences are not pleasant. "We are a different kind of company," says Farias, "and our rapid growth shows that our customers like the change."

The progressive company is also in the process of expanding into new markets via franchising.
